

Deliver Secure, Low Latency HD Video Throughout Stadiums, to Broadcasters and to Mobile Audiences Globally

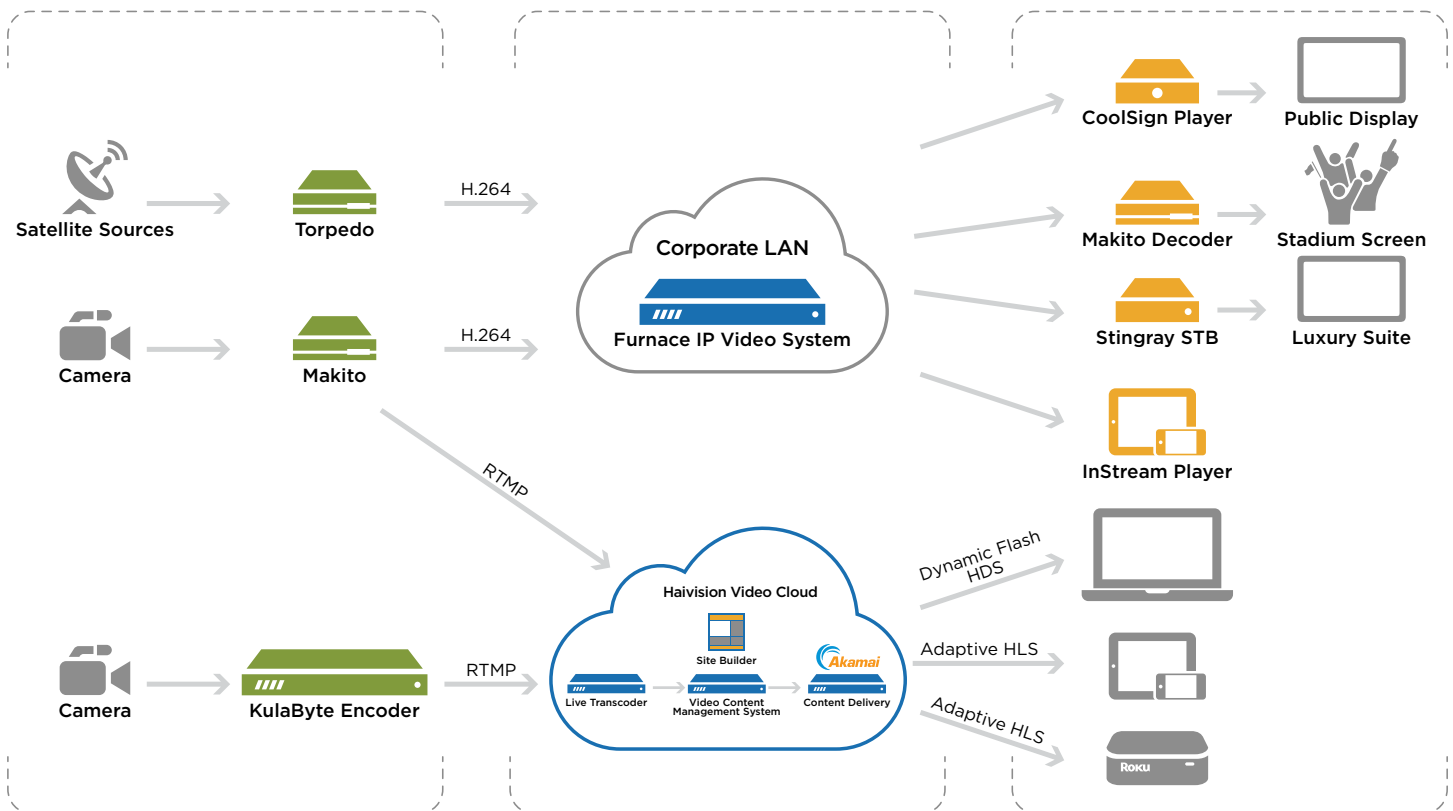

- Connect your stadiums with very low latency HD video for real-time interactions
- Capture every source within the stadium with economical, compact, easy-to-deploy appliances
- Instantly deliver secure, live multi-stream HD video on any desktop, display, and mobile device
- Leverage Internet resources and deliver over-the-top (OTT) video to all Internet viewers
- Integrate data-driven digital signage with HD video streaming throughout your venue
- Provide content creators and producers with real-time access to all broadcasts in HD
- Capture baseband video or Digital Video Broadcasts (DVB) securely to IP multicast
- Integrate compact, high quality HD encoders as an alternative to bulky, expensive, traditional encoders
- Broadcast your content online to global audiences anywhere, anytime

Haivision offers a portfolio of products and services enabling some of the largest stadiums, arenas, and the world's top broadcasters meet their video delivery challenges. Haivision products offer H.264 HD video up 1080p60 with extremely low end-to-end latency, while Haivision's Internet media services simplify cloud transcoding and CDN delivery globally. Haivision solutions combine HD quality with exceptional bandwidth efficiency, delivering high quality video to desktops and mobile devices, on-premise or in the cloud. With Haivision's affordable, scalable, easy-to-deploy, and low maintenance solutions, you can stream live high profile events to global audiences anywhere, anytime.

Sports & Entertainment

LIVE EVENT STREAMING WITH HD, LOW LATENCY VIDEO

CONTRIBUTE

- Performance 1080p60 encoder - Makito
- Internet streaming encoder - KulaByte
- Secure DVB to IP gateway - Torpedo
